FOURTH REQUEST FOR CORRECTION OF FILING RECEIPT

Commissioner for Patents
P.O. Box 1450
Alexandria VA 22313-1450

Sir:

Applicants respectfully request that the Filing Receipt for the above application be corrected as shown in red on the enclosed copy thereof.

The first amendment inserts a reference to Application Serial No. 08/983,404, of which Application Serial No. 09/140,860 is a continuation-in-part. Both the Application Data Sheet filed with this application and the "Cross-Reference to Related Applications" paragraph on pages 1-2 of the specification correctly list Application Serial No. 08/983,404 and its relationship to Application Serial No. 09/140,860.

With regard to the (second) "Response to Request for Corrected Filing Receipt" mailed September 17, 2004, which refused to insert a reference to Application Serial No. 08/983,404 on the grounds that a claim for priority cannot be based on an application filed after the application making the claim, the Office's attention is respectfully directed to the fact that Application Serial No. 08/983,404 is a Section 371 National Phase of International Application PCT/US96/12000, filed July 19, 1996.

Although an application such as Application Serial No. 08/983,404 is usually considered as having as its "filing date" its entry into the national phase under Section 371, 35 USC 365(c) specifically provides that "In accordance with the conditions and requirements of section 120 of this title, . . . a national application [such as Application Serial No. 09/140,860] shall be entitled to the benefit of the filing date of a prior international application designating the United States". Accordingly, Application Serial No. 09/140,860 can validly claim the priority of Application Serial No. 08/983,404, or PCT/US96/12000, whichever serial number the Office prefers to use. It is further noted that U.S. Patent No. 6,710,540, issued on the parent of the present application, does contain a claim to the priority of Application Serial No. 08/983,404.

The second amendment inserts the correct serial number and filing data for the application originally stated as being Application Serial No. 60/065,529. The correct serial number and filing date are given on the front page of the aforementioned U.S. Patent No. 6,710,540 issued on the parent of this application. The last amendment simply removes the statement that the data provided by applicant is not consistent with PTO records.

A corrected Application Data Sheet is filed herewith. The corrected Application Data Sheet corrects the serial number originally given as "60/065,529" to "60/065,629" in the same way as on the Filing Receipt (but note that the filing date in the Application Data Sheet was given correctly). Also filed herewith is a Preliminary Amendment making corrections in the "Cross-Reference to Related Applications" section of the description.

LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING

LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).
